Voices of Participants

I was able to make new friends and practice my Japanese.

My language exchange partner was close in age to me, so it was easy to talk.

Language exchange partner was very open to learning about my culture and a great listener.

I have learned a lot of new aspects about Japanese culture and history. The project inspired me to visit Japan one day.

It was interesting to see how Japanese is used in a casual setting, as in class we only really get to use more formal Japanese.

The exchange was really helpful and many people would appreciate it, even if they don't know a lot of Japanese.

I think one of the many fears of any language learner is not being able to use it when needed, and the project helped show me that that fear is unfounded.

The Conversation Starter Guide provided by the Hosei University before the project started was very helpful for starting conversations and my own self-study.

I would love to join in the similar project more in the future.
