AICO
ADAS INNOVATION CHALLENGE OPEN FOR YOUNG PROFESSIONALS AND STUDENTS

Are you auto-motivated? Welcome to AICO!

Welcome to the 1st edition of AICO, an exciting international algorithm design competition with the aim to create Advanced Driver Assistance Systems (ADAS) applications based on visual information.

The challenge is open to worldwide young professionals and students who are interested in image processing, computer vision and pattern recognition.

The challenge is "detection of moving construction site". Contestants will have to provide image processing algorithms that will correctly identify situations where a moving construction site is placed on the road, based on video data provided.

Important Dates

* Starting Date:	May 15th, 2015
* Submission Deadline:	**September 30th, 2015**
* Winners Announcement:	October 30th, 2015
